SPRING P

The Spring series by Eva Zeisel is characterized by soft curves and fluid lines. Composed of mouth-blown Venetian glass, the svelte shape of Spring comes in several models including pendant, wall sconce and table. Most unusual is the shade-less table lamp, which emits ambient light and resembles a glowing sculpture. It is accented with polished chrome at its base. The color palette for Zeisel's creations reflects the natural aesthetic of the lights. Spring is offered in glossy white, as well as warm honey.

key to symbols

This marking is used on products for export to the Canadian and USA markets, which guarantees that the product conforms to the safety requirements of those countries

This Marking is used on products for export to the USA market, which guarantees that the products conform to the safety requirements to the USA.

The ETL Listed Mark indicates to distributors, retailers and customers that your product has been tested by Intertek and found in compliance with accepted national standards.

This mark guarantees that the product has passed all the tests established for electrical safety standards by the European Community

Fixture class II. A fixture where protection against electric shock does not rely only on the main insulation but also further safety measures involving double insulation or reinforced insulation

Fixture class III. A fixture where protection against electric shock depends on the very low and safe voltage supply, guaranteeing no higher voltage levels are generated. N.B. a Class III fixture does not necessarily require grounding protection

Index protection. A symbol that identifies the protection index against dust, solid particles or damp entering the fixture

The Americans Disabilities Act

Certifies that a product conforms to EN standards and has been designed and manufactured by companies with an approved UNI EN ISO 9000 quality control system. The ENEC symbol is issued by authorised boards to guarantee the safety and quality of our products for the final customer

Low-energy consumption lamps can be used (fluorescent and/or LED)

These lamps do not require shields.
