# of Lighting

# Goodbye Watts, Hello Lumens.

There seems to be some confusion these days about how to tell how bright a light bulb really is. It was easy enough when we all used incandescent lights. You could choose from a 40, 60, 75 or 100 watt bulb, and we all have a rough idea of how bright that will be. With the introduction of CFL and LED technology this now has all got a little confusing.

## So... just look at the lumens

A Lumen is standard unit of light as it is perceived by the human eye. Essentially, it will tell you how bright something is, unlike a watt, which is actually a measurement of energy consumption or output. The lighting industry has standardized the way that it measures the total emission of light from a product and now include it on most packaging. Below is our easy to follow traffic light system on how to select your energy saving bulb option.

## Bulb efficiency

Types on bulb	Bulb Efficiency (Lm/W)
Standard Incandescent	Approx 15Lm
Halogen Lamp	Approx 25Lm
Compact Fluorescent (CLF)	Approx 50Lm
LED	Approx 80Lm

## Energy efficiency

From March 2014, Luminaires will carry an energy rating label in line with the EU Directive 874/2012.

This label displays the energy efficiency range of the luminaire and the compatibility with the lamps on the market.

The Energy rating A+++ (very efficient) through to E (least efficient) is calculated based on the Lumen output and the Wattage consumption, the more efficient the lamp used the higher the Eco rating.

Where Luminaires can be fitted with different rated lamps and/or the lamps are non-removable (LED's) a bracket indicates compatible energy classes. Where some rated lamps are not compatible with a luminaire these energy classes are marked out with an "X"

A guide to current lamp types and their energy classes are as follows: -

LED lamps	CLASS A -A+++
Compact Fluorescent	CLASS A & B
Halogen lamps	CLASS C & D
Incandescent lamps	CLASS E

For more information about a fittings energy rating please visit our website [www.searchlightelectric.com](http://www.searchlightelectric.com)

YE	Yellow

## Bathroom lighting regulations (IP rating = ingress protection rating)

### IP ratings

All installations must comply to guidelines which are based on a zonal concept similar to that used for the installation of lighting around swimming pools.

Each zone rating (IP) is determined by the degree of risk of electric shock.

#### Zone 0

This is the area inside the bath or shower basin and is rated at IPx7.

#### Zone 1

Refers to the area above the bath or shower up to a height of 2.25 metres and carries a minimum rating of IPx4.

#### Zone 2

Covers an area 0.6 metres wide immediately next to, and all around zone 1, plus the area over 2.5 metres high directly over the bath or shower. Wash basins should also be treated as zone 2. The minimum rating here is IPx4.

Where water jets are likely to be used for cleaning purposes in zones 1 and 2, the rating is a minimum IPx5.

#### Outside Zone

Covers any area outside Zone 1 and Zone 2, there is no special requirement in this zone.

Bathrooms are now allowed to contain a socket outlet, this must be located 3m outside Zone 1.

Lighting circuits and any socket-outlet circuit in a room containing a bath and/or shower must be provided with 30MA rcd protection.

#### Area Around Sinks

Covers up to 60cm

Zone 2 IPx4 Luminaires should be installed in this zone.

## Feature icons

	<b>Low Energy</b> The fitting accepts low energy bulbs.		<b>Adjustable Arms</b> Flexible fittings for maximum convenience.
	<b>Switched</b> The fitting is controlled by a rocker switch.		<b>Paintable</b> The fitting can be painted to suit any decor.
	<b>Illuminated Switch</b> The fitting is controlled by a illuminated switch.		<b>Motion Sensor</b> The fitting is activated by motion.
	<b>Convertible</b> The fitting can be converted from pendant to flush.		<b>LED</b> The fitting uses the latest LED technology.
	<b>Three Stage Touch</b> Low, medium and high.		<b>Remote Control</b> The fitting is operated and supplied with a remote control.
	<b>Dimmable</b> The fitting can be dimmed using a suitable dimmer.		<b>LED</b> The fitting uses the latest LED technology.
	<b>Easy Fit</b> The fitting requires no electrical wiring.		<b>Guarantee</b> The finish is guaranteed for three years, except within five miles of the coastline.

## Crystal glass chandelier cleaner

For best results always use Crystal Cleaner.

# Give yourself the **eco COOL**

with energy efficient LED bulbs

LED Filament Bulbs are perfect for any light fitting or room setting to create the authentic look and style of a vintage incandescent bulb, but with the superior efficiency and long life of an LED. The traditional cage style internal filaments in the light bulbs glow with warm, ambient light, making these LED filament bulbs a real statement piece that will look stunning on their own or in any transparent light fixture. Fill your room with beautiful light with authentically detailed filaments available in a great choice of bulb shapes and filament styles.
