MAX^{}light

2016

Mamy ogromną przyjemność
zaprezentować Państwu
najnowszy katalog produktów
oświetleniowych oferowanych
przez MAXlight.

Zapraszamy do zapoznania
się z naszą kolekcją.

Zespół **MAX***light*

WSPARCIE DLA ARCHITEKTÓW

Gdybyśmy mieli jednym zdaniem określić filozofię naszej firmy, to brzmiałoby ono tak: **systematycznie dążymy do doskonałości, ponieważ wiemy, że nasi klienci cenią wszystko, co najlepsze.** Właśnie dlatego naszą bogatą ofertę projektujemy potrzebami i wizją, którym nadajemy realne kształty, podążamy za światowymi trendami oraz sami kreujemy nowe oblicze wzornictwa.

Już ponad 10 lat funkcjonujemy na rynku, i taki sposób myślenia niezmiennie pomaga nam definiować konkretne know-how, które uwzględnia zachwycający design, doskonałą jakość materiałów i wykonania oraz obsługę na najwyższym poziomie.

Rozumiemy, że światło jest ważnym elementem wystroju, który decyduje o prawdziwym obliczu wnętrza. To właśnie światło w oprawie stylowej i nowoczesnej lampy zapewnia pozytywną energię w pochmurne dni oraz pozwala błogo wypoczywać w dyskretnym półmroku. Ciepły blask powiększa optycznie małe pomieszczenia, a światło punktowe eksponuje meble i łączy funkcjonalność z ciekawym efektem wizualnym. Dlatego nasza oferta odzwierciedla wszystkie potrzeby i pozwala wybrać oświetlenie w zachwycającej oprawie, które aktywnie kreuje przestrzeń oraz efektownie rozświetla codzienność.

Wiemy, że nasi klienci szukają alternatywy dla lamp dostępnych w największych sieciowych sklepach, dlatego proponujemy różnorodne oprawy, dzięki którym każde wnętrze nabierze wyjątkowego charakteru.

W TROSCE O ŚRODOWISKO

LED ŚWIATŁEM DZISIEJSZYCH CZASÓW

Tradycyjne żarówki odchodzą do lamusa. Powodem tej generacyjnej zmiany stała się technologia LED, która całkowicie zrewolucjonizowała podejście do oświetlenia. Kusi nie tylko swoją żywotnością, ale także wpisuje się w najnowsze trendy ekologiczne oraz designerskie. Oświetlenie typu LED łączy estetykę form z oszczędnością, i coraz śmielej wkracza do naszych domów.

Oświetlenie ledowe jest rozwiązaniem bardzo korzystnym dla środowiska. Przeciętny czas pracy jednej diody pozwala na jej eksploatację przez 5-7 lat (ok. 50000 godzin), dzięki czemu ograniczamy ilość odpadów. Co więcej, w przeciwieństwie do świetlówek, diody nie zawierają trujących i szkodliwych dla środowiska substancji, takich jak rtęć czy metale ciężkie. Technologia LED przyczynia się także do redukcji produkcji gazów cieplarnianych, zmniejszając emisję CO2.

W DŁUŻSZEJ PERSPEKTYWIE WYBÓR ROZWIĄZAŃ, KTÓRE SĄ OPARTE NA TECHNOLOGII LED POZWALA ZAOSZCZĘDZIĆ AŻ DO 85% NA ZUŻYCIU PRĄDU

Oświetlenie oparte na technologii LED to korzyść nie tylko dla środowiska, ale i dla naszego portfela. Jest zdecydowanie najwydajniejsze: zużywa do sześciu razy mniej energii niż tradycyjne żarówki i dwukrotnie mniej niż świetlówki, które tracą blisko 90% na produkcję ciepła. Ledy są najbardziej energooszczędnym źródłem oświetlenia dostępnym obecnie na rynku. Ich sprawność wynosi aż 80-95%, podczas gdy dla tradycyjnego oświetlenia waha się ona w przedziale 5-10%.

CIEPŁO - ZIMNO

Wiele osób oświetlenie LED łączy tylko z zimną barwą, tymczasem jest to cała paleta barw od zimnych do ciepłych. Barwa światła emitowanego przez LED-y wiąże się z rodzajem półprzewodnika, jaki został użyty podczas produkcji. Zastosowanie odpowiedniego materiału pozwala uzyskać dowolną barwę światła, a tym samym dostosować oświetlenie do funkcjonalności oraz nastroju jaki panuje wewnątrz pomieszczenia. Światło białe możemy podzielić na te o barwie zimnej, dziennej oraz ciepłej. Barwa zimna nadaje pomieszczeniom sterylny wygląd. Barwa ciepła jest bliska tej, jaką emitują tradycyjne żarówki. Doskonale sprawdza się w przypadku pomieszczeń, w których odpoczywamy, dlatego z powodzeniem możemy wykorzystać ją w sypialni bądź salonie, budując tym samym odpowiedni nastrój. Neutralną barwę światła stosujemy w pomieszczeniach przeznaczonych do pracy biurowej i nauki, wspomagając tym samym koncentrację, ponieważ jest to barwa najbardziej zbliżona do światła naturalnego, tzw. „dziennego”.

OŚWIETLENIE DO ZADAŃ SPECJALNYCH

Lista rozwiązań LED jest długa i ciekawa, tym bardziej, że poprzez zastosowanie diod RGB możemy uzyskać dowolną barwę światła, nie tylko białą.

Dzięki temu technologia LED stała się elementem wielu wystaw, pokazów oraz ekspozycji, dostarczając nietuzinkowych efektów świetlnych. Nie oznacza to bynajmniej, że nie jest to rozwiązanie dostępne dla naszych domów. Barwne światło uzyskane dzięki tej technologii staje się dopełnieniem wielu wnętrz, budując niepowtarzalny oraz oryginalny klimat.

Równie ciekawym rozwiązaniem oświetleniowym z wykorzystaniem technologii LED jest eksponowanie konkretnych przedmiotów, półek, wnęk, lustek bądź stref na ścianie. Diody LED pozwalają oświetlić każdą, nawet najmniejszą bądź trudnodostępną przestrzeń, umożliwiając przy tym tworzenie oryginalnych iluminacji, które staną się przysłowiową kropką nad „i”.

Zwykła żarówka pozostaje zatem bez szans, nie tylko w przypadku jej niskiej wydajności i żywotności - przegrywa także z wachlarzem możliwości jakie stwarza technologia LED.

TRZY RZECZY PRZYCZYNIAJĄ SIĘ DO STWORZENIA PIĘKNA:
PRZEDĘ WSZYSTKIM NIEPODZIELNOŚĆ LUB DOSKONAŁOŚĆ
NASTĘPNIE, NALEŻYTA PROPORCJA ALBO TEŻ HARMONIA
A WRESZCIE, JASNOŚĆ I ŚWIATŁO.
