 **OZCAN**  
aydınlatma

Özcan Aydınlatma 1987 yılında, yaşamınızı usta dokunuşlarla renklendirmek, bugününüzü aydınlatmak, yarınlarınıza ışık tutmak amacıyla kuruldu.

O günlerden bugünlere hiç değişmedi. İlkelerinden ve bakış açısından taviz vermedi. Kalitesini hep korudu. Sürekli daha iyiye ulaşmayı arzuladı. Bugün de çeyrek asrı geçen tecrübesi ve kalitesiyle hayatınızın önemli bir parçası olmaya devam ediyor.

Kurulduğu 1987 yılından bugüne estetik çizgileriyle ve modern tasarımlarıyla hayatınıza ışık tutan, yaşadığınız mekanları parlak fikirler ile aydınlatan Özcan Aydınlatma, kalitesini ve şıklığını koruduğu yeni tasarımlarından oluşan 2016 koleksiyonunu gururla beğeninize sunar.

Özcan Aydınlatma: Parlak fikir.

Özcan Lighting was founded in 1987 to colour your lives with masterly touches, to enlighten your today, and to illuminate your future.

Since those days, the company has stayed true to its original vision, always adhering to same principles and perspective. It has consistently maintained high quality standards, and always strived to better itself.

Today, with more than a quarter century of experience and a quality line of products, the company continues to be an import part of your lives.

Since its inception in 1987, Özcan Lighting combines aesthetic lines with modern designs, and illuminates your living spaces with bright ideas. Today, the company proudly presents its 2016 collection to introduce you new designs with accustomed quality and style.

Özcan Lighting: A bright idea.

2016 Collection

## Kelvin değerini nasıl yorumlamalıyız?

Doğada çıplak gözle görülen ışığın rengi teknik olarak CCT (correlated color temperature = ilişkili renk sıcaklığı) parametresi ile ifade edilmektedir ve bu değerlerin terim kavramı "KELVİN" olarak adlandırılmaktadır. Işık kaynakları çeşitli renk ve Kelvin değerleriyle hayatımıza sunulmaktadır ve bu nedenle yaşadığımız ortamlarda renk seçimi yapma hakkımız doğmaktadır. Özellikle led ışığı kullanılan ürünlerde 2500k-10000k arası üretimle; pastel kırmızıdan, ral maviye akan renk aralığı oluşmaktadır.

Renk sıcaklığı değeri rengin kırmızıya veya maviye yakınlığının ölçüsüdür. Sayısal değer azaldıkça renk kırmızıya dönük, arttıkça maviye dönük algı oluşturur.

Pratikte birçok kez sayısal değer yerine sözel ifadeler kullanılmaktadır. 3500 Kelvin ve altı; kırmızı – sarıya yakın renkler, sıcak beyaz (warm white) olarak adlandırılırken; 3500-5000 kelvin arası nötr beyaz (natural white) olarak ifade edilmektedir. 5000 kelvin üzeri maviye yakın renkler ise soğuk beyaz (cold white) olarak adlandırılmaktadır.

Kullanım olarak mimari ve dekoratif açıdan renk sıcaklığına bakarsak; sıcak beyaz renkler samimi bir ortam sağlar. Bu yüzden oteller ve konutlarda kullanımı oldukça yüksektir. Soğuk beyaz renkler ise daha çok okul, hastane, ofis tarzı mekanlara uyum sağladıkları için seçim bu yönde oluşmaktadır.

Çizelgede, Kelvin değerine göre renk geçişleri daha ayrıntılı olarak belirtilmiştir.

## How must we construe the "Kelvin value"?

Color of the light seen with the naked eye in nature is technically represented by the value of CCT (correlated color temperature) parameter and the term concept of this value is called as 'KELVIN'. The light sources are presented to our lives with a variety of colors and Kelvin values and therefore we have the right to make color selection in the environments we live. Especially in products where LED is used the production is between 2500K-10000K; and the color range is flowing from pastel red, to ral blue.

Color temperature is a measure of the value of the closeness of the color red or blue. When the numerical value decreases the color is towards red and when the numerical value increases the color is towards blue.

In practice, verbal expression is used more often instead of the numeric value. 3500 Kelvin and below and colors close to red – yellow are expressed as warm white while colors between 3500-5000 Kelvin are called as neutral white. Colors close to blue above 5000 kelvin cool are called as cold white

If we consider usage of color temperature in terms of architectural and decorative aspects, warm white color provides a friendly atmosphere. As such, the use thereof is very high in hotels and houses. The cool white color is preferred more in schools, hospitals and offices because its usage in this direction is more appropriate.

Color gradations according to the Kelvin value are expressed in more detail in the table below.

İŞIK KAYNAĞI	LÜMEN	LÜMEN/WATT	ENERJİ SINIFI	EŞDEĞER LED	TASARRUF ORANI	EŞDEĞER LED TÜKETİMİ	FATURADAN TASARRUF
